
concept industrial Fwd: Conference/workshop on "Industrial Applications and Prospects of Computer Algebra"

Posted by Martin Albrecht - 2009/09/05 13:05

So let me kindly ask if you/your company/organisation basically would be interested to contribute to this event, in terms of talks, exhibitions, or financial support. It sounds like it could be fun and useful. Cheers, Martin PS: Harald, did you also receive this? I guess I received it because of our article in the Computer Algebra Rundbrief.

So, does anyone around here want to give a talk or an exhibition or something at this conference by the Fachgruppe Computeralgebra in Germany? I think a quick 'I might be interested' would suffice. I can also ask for more details if that is what is required. Cheers, Martin

So, does anyone around here want to give a talk or an exhibition or something... I'm interested. This might be useful for Sage in several ways: New contacts in Germany (roughly #2 in the stats), improve our skills of communicating Sage: <http://groups.google.com/group/sage-marketing> (poster, fact sheet, stickers, etc.) and it's an additional selling point for Sage to be represented at an event with industry background. H

I'm interested. This might be useful for Sage in several ways: New contacts in Germany (roughly #2 in the stats), improve our skills of communicating Sage: <http://groups.google.com/group/sage-marketing> (poster, fact sheet, stickers, etc.) and it's an additional selling point for Sage to be represented at an event with industry background. Hi, while I am in principle interested too, I can't really commit to take care of this at the moment. Harald and Serge, if you don't mind I will put you in contact with Michael Hofmeister so that you guys can work out the details? Cheers, Martin

Harald and Serge, if you don't mind I will put you in contact with Michael Hofmeister so that you guys can work out the details? It would be good to learn at least - possible dates - if they regard Sage as a company (and will ask us to pay to set up a booth) - can they provide funding for some Sage people to attend, or do we need to sort that out ourselves? I'd be happy to help out with the booth and talks when the time comes. Thanks. Burcin
